Professional Summary

Motivated and results-driven backend developer with experience building scalable server-side applications and modern backend systems. Skilled in REST APIs, WebSockets, cloud technologies, caching, and multi-tenant architectures. Focused on building maintainable, secure, and reliable systems using modern development practices.

Core Competencies

Java, Spring Boot, REST APIs, WebSockets, PostgreSQL, MySQL, Redis, AWS (EC2, S3, SQS, Lambda, RDS, IAM), Docker, Terraform, GitHub Actions, CI/CD, Flyway, JPA/Hibernate, Supabase, Metabase, SQL, Cloud Architecture

Professional Experience

Back-end Developer – Mesh-Web, Prishtinë (Aug 2024 – Feb 2025)

- Developed core modules for a multi-tenant Mobile Device Management (MDM) platform using Spring Boot and Spring Data JPA.
- Implemented WebSocket communication for real-time device monitoring and Redis caching.
- Managed Flyway database migrations.
- Designed scalable relational data models.

Back-end Developer – Tech-Frame, Prishtinë (Sep 2021 – May 2024)

- Built REST APIs with WebSockets.
- Used AWS EC2, S3 and SQS.
- Automated CI/CD with GitHub Actions and Docker.
- Generated PDFs, reports and CSV integrations.

Freelance Backend Developer – Analytics Platform (Supabase + Metabase) (Dec 2025 – Jan 2026)

- Designed a multi-tenant analytics backend using Supabase.
- Implemented Row-Level Security (RLS).
- Built SQL queries and Metabase dashboards.
- Integrated Make.com workflows.

DevOps Intern – Cactus Sh.A, Prishtinë (Jul 2026 – Present)

- Assisting with CI/CD pipelines and deployment automation.
- Learning and working with Docker and DevOps practices.
- Supporting infrastructure, monitoring, and deployment workflows.
- Collaborating with the engineering team on DevOps tasks and automation.

Projects

File Processing Service – AWS Cloud Project (Apr 2026 – Present)

- Designed and developed a cloud-native file processing platform using Java 17 and Spring Boot.

- Built REST APIs for uploading and managing file processing jobs.
- Implemented asynchronous processing using Amazon SQS and AWS Lambda.
- Stored files in Amazon S3 and persisted job data in MySQL.
- Developed a serverless worker for automated file processing.
- Created Flyway migrations and automated tests.
- Containerized services with Docker and built CI/CD pipelines using GitHub Actions.
- Provisioned infrastructure using Terraform, including S3, SQS, Lambda, IAM, CloudWatch and RDS.

Education

BSc – Computer Science, Universum College, Prishtinë (Oct 2021 – Present)

Professional Diploma – Development of Web & Mobile Applications, Cactus Education, Prishtinë (Sep 2020 – Jun 2022)

Languages

English (Fluent) • Albanian (Native)
